Pre-Inspector Level 1 Training was designed to educate participants to patrol power lines to ensure vegetation clearance in accordance with safety regulations.

Through the two week course, participants will cover a variety of topics such as:

- General safety
- Tree biology, growth rates, identification, and clearance
- Utility tree risk assessment and hazard tree assessment
- Contracts and customer communications
- Reporting electronic tools

Pre-Inspector Level 1 Training requires full-time participation, therefore, to support participants, the UVM Scholarship Program provides a $1,200 stipend to college-approved participants upon successful course completion.
