

INDUSTRIAL MOTOR CONTROLS

Delve into the realm of motor systems with a specialized training that comprehensively covers motor contactors, manual motor starters, and motor soft starts.

This HANDS-ON course equips participants with the knowledge and practical skills required to design, install, troubleshoot, and maintain these critical components, enabling efficient and reliable motor operations across various industrial and commercial applications.

This class is interactive as well as discussion orientated. It is designed to be fully customizable to your employee training needs and we are able to conduct this training at your site or ours.

Brief Class Outline

- Introduction to motor controls
- Motor contactors
- Manual motor starters
- Motor Soft starts
- Control logic interlocking and real-world applications
- Troubleshooting and maintenance
